DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 4-14 rejected under 35 U.S.C. 103(a) as being unpatentable over Feygin (5876550) in view of Farnworth (6482576).

Feygin teaches a support unit (2) for supporting the shaped article with a position controller (16), a coating unit section (12) for coating the layer, a flat surface laminating unit, cleaning section (20), conveying section that moves the table in a direction (2A), a light irradiating section (7).

Feygin fails to teach a rotation table and curved-surface laminating unit.

Farnworth does teach the rotational table and curved-surface laminating unit (Col. 6, lines 18-31; Col. 12, lines 28-48) that teaches aspects of the shaping table and

Art Unit: 1722

building an insert article into the shaped article. The shaping table would allow for a curved-surface laminating unit.

It would have been obvious for one of ordinary skill in the art to modify Feygin with a shaping table as taught by Farnworth for manufacturing of a multi-layer shaped article with enhanced smoothness (Col. 1, lines 12-14).

Claim Objections

4. Claim 14 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claim merely claims features of the article (or product) itself. It does not further limit an apparatus claim as it does not provide any further structural limitation of the apparatus itself. A product limitation in an apparatus claim that does not have any structural limitation to the apparatus itself and thereby does not have patentable weight in the claim.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emmanuel S. Luk whose telephone number is (571) 272-1134. The examiner can normally be reached on Monday-Thursday 8 to 5 and alternate Fridays.
